Adding and Subtracting Mixed Numbers
Journal Prompt

Solve the following problem using a visual model and an equation:

Mrs. Bailey was preparing for her 4th grade art class. She needed $4\ \frac{5}{12}$ gallons of paint. She had $1\ \frac{9}{12}$ gallons of red paint and $2\ \frac{4}{12}$ gallons of blue paint. Does Mrs. Bailey have enough paint? If so, how much extra does she have? If not, how much more does she need?
