Multiplicative Comparison Word Problems Homework

1. There are 6 red fish in the aquarium. There are 3 times as many blue fish as red. How many blue fish are there?
 - a. What is being compared?
 - b. Write an equation using a variable to represent the problem.
 - c. Solve using a bar model. Circle your final answer.

2. In January, a total of 8 inches of snow fell to the ground. This is 4 times as much snow than the total snowfall in December. How many inches of snow fell to the ground in December?
 - a. What is being compared?
 - b. Write an equation using a variable to represent the problem.
 - c. Solve using a bar model. Circle your final answer.

Choose 3 numbers related by multiplication. (Example: 6,3,18). Write a comparison word problem like the ones you just completed for homework. Tell what is being compared, write an equation, and show a bar model to pr
